STATEC

The STATEC Hackathon is returning for a second, even more ambitious edition. Organised by STATEC and the GovTech Lab, this event brings together enthusiasts of data, technology, innovation and analysis to tackle real-world challenges for the benefit of Luxembourg.

Over three days, join a community of passionate talent and tackle real-world challenges by harnessing the power of data to conceive the solutions of tomorrow.

STATEC is the National Institute of Statistics and Economic Studies of the Grand Duchy of Luxembourg. Its mission is to provide citizens, public institutions and private decision-makers with high-quality statistical information, offering a detailed, reliable and objective view of Luxembourg society and the economy.

GovTech Lab is a technology innovation accelerator within the Luxembourg government. A joint initiative of the Ministry of Digitalisation and the State Information Technology Centre (CTIE), its missions are to accelerate the government's technological transformation and to develop a GovTech community.

Where and when?

WHY **PARTICIPATE ?**

Take on high-impact challenges

How can we make data more accessible, easier to understand and more useful for everyone? How can we help citizens, businesses and decision-makers to better understand the country's economic and social developments?

Over three days, use data on Luxembourg's society and economy to create apps, interactive visualisations, smart dashboards or even solutions based on artificial intelligence. The aim: to make data more accessible, understandable and useful for decision-making.

Collaborate with talented people from a variety of backgrounds

The best ideas often arise from a diversity of perspectives. Join a community of developers, data scientists, economists, statisticians, UX/UI designers, business analysts, project managers and students to take on high-impact challenges.

Expand your network

Take advantage of a stimulating environment to network with public sector experts, data specialists, innovators and professionals committed to Luxembourg's digital transformation.

THE **CHALLENGE**

Beyond the figures, data tells a story.

The STATEC Hackathon aims to address real-world economic and societal issues by using the wealth of statistical data. Your task will be to devise innovative solutions that enable a better understanding of trends, shed light on economic and social phenomena, and facilitate decision-making.

This challenge brings together coding, IT expertise, data analysis and economic knowledge to go beyond the raw figures and transform them into concrete solutions for the nation's future.

WHO CAN **PARTICIPATE?**

The STATEC Hackathon is open to teams of 3 to 6 participants.

The event is open to everyone: students, professionals, researchers, entrepreneurs and data enthusiasts. A diverse range of backgrounds is a real asset.

We encourage the formation of interdisciplinary teams to foster creativity, innovation and the development of original solutions. Join the adventure!

HACK-ATHON

AGENDA

14-16 OCT. 2026

Join the adventure!

Whether you're a data expert, a developer, an economist, a designer or simply someone who's curious and motivated, the STATEC Hackathon is an opportunity to put your skills to work on projects that make a difference.

DAY 1
14 OCT. 2026

09:00 / 09:30
Arrival of participants

09:30 / 10:30
Presentation of datasets

10:30 / 12:00
Hacking

12:00 / 14:00
Lunch & Networking

14:00 / 18:00
Hacking

DAY 2
15 OCT. 2026

08:00 / 09:00
Arrival of participants

09:00 / 12:00
Hacking

12:00 / 13:00
Lunch

13:00 / 19:00
Hacking & pitching preparation

DAY 3
16 OCT. 2026

08:00 / 09:00
Arrival of participants

09:00 / 10:30
Hacking & pitching preparation

10:30 / 12:30
Pitching sessions

12:30 / 14:30
Networking cocktail & announcement of the winners
