HOUSING EXPENDITURES

Household composition and housing characteristics

STATEC conducts this annual expenditure survey among a number of households in Luxembourg. Given that not all households in Luxembourg can be involved in this survey, a representative sample has been chosen at random to represent all resident households. Your household's responses therefore reflect a large number of other similar households in Luxembourg. This is why your participation is so important.

Your data will be treated with the utmost confidentiality: the STATEC law of 10 July 2011 defines a clear framework for the protection of your data. According to this law, your participation is mandatory.

A PRACTICAL GUIDE

This booklet focuses on the socio-demographic characteristics of the members of the household (age, nationality, occupation, sources of income, etc.) as well as on the household's accommodation (size, type, energy performance, etc.). Households will also be asked to provide details of their housing-related expenditure (rent, property costs, energy costs, renovation work, etc.).

Who is concerned by this booklet?

- Information on all the persons living in the same dwelling must be entered in this booklet. A household can also consist of just one person.
- It is suggested that the person who has an overall view of the household's expenditure fills in the "Housing" section.

How do I fill in this booklet?

- The "reference person", shown first in the grid of the questionnaire, should be the person who contributes most to the household income.
- The other members of the household (if applicable) should then be entered from oldest to youngest.
- It is advisable for households to use their most recent annual statements as a basis for entering their expenditure on housing.
- The amount of expenses should be given in euros.

If you have any further questions, the interviewer will be glad to help you.

THE HOUSEHOLD

RELATIONS BETWEEN HOUSEHOLD MEMBERS

A household can be composed of:

- Several persons living in the same household.
