Unit F2: Labour Market Statistics

Quality Report for the Labour Force Survey AD HOC MODULE 2008

Administrative information relating to the LFS AHM

Note: in all the report, yellow parts are for MS filling in.

Administrative information (to complete)

Country	Luxembourg
Statistical product (name)	<i>Labour Force Survey Ad Hoc Module on the labour market situation of migrants and their immediate descendants</i>
Reference period	2008
Reference quarter(s): Q2 or Q1-Q4	Q1-Q4
Contact person(s) for the present report	Liliane Reichmann

Abbreviations used in the report (to complete)

[illegible]

Design and methods used for the LFS AHM

AHM sample of the persons interviewed (if smaller than the core sample)

Selection of the sub-sample	No sub-sample. All persons fulfilling the filter criteria were interviewed
Size of sub-sample (number of persons)	NA
Sub-sample representativeness over the year (survey period)	NA

AHM weighting factors

Appliance of the annual core weights (col.183-188)	Yes
Appliance of the quarterly core weights (col.189-194)	NA
No specific weights were defined for the ahm by regulation 102/2007, but did you use any specific weights?	NA
If specific weights were applied, please give a brief description of the calculation method	NA

AHM data collection

Is the module questionnaire separated from the LFS core questionnaire, i.e. asked after all core questions ?	Yes
Average interview duration per person (in minutes) Core and AHM (NEW)	Questions of the core questionnaire and those of the ad hoc quest.make part of one integrated interview. 10-15 minutes pr person and 2-3 minutes the ad hoc module
Average interview duration per person (in minutes) only AHM (NEW)	
Is the participation voluntary/optional or compulsory ?	voluntary
Are proxy interviews for the ahm allowed (Yes/No)	Yes
Share of proxy interviews (NEW)	52.70%

Number of questions per variable

Col. 203/206	1
Col. 207/208	1
Col. 209/210	1
Col. 211/212	1
Col. 213	1
Col. 214	1
Col. 215	1
Col. 216	1
Col. 217	1
Col. 218	1
Col. 219/220	1

Additional questions in the module beyond those required by Commission Regulation No 102/2007

Occupation of father and mother
Highest level of education of father and mother

Description of the main national problems encountered when implementing the ad hoc module

Recommendations for improvement of such a module in the future

Transcoding of the national questionnaire to the AHM

no special transcoding for the variables

Accuracy of the LFS AHM

Coefficient of variation

NB: for the calculation of the CV it is necessary to take into account the design effect.

	Number of persons national at birth (Col.203/206 = 9997)	Number of persons most relevant group about the country of birth of father (Col.207/208 = 01-98)	Average number of years of residence in the host country (Col.211/212 = 01-98)	Number of persons migrated for employment reasons and not found a job before migrating (Col.213 = 3)
Estimate	187 098	PT: 54981	27	10 734
CV	0.55%	3.41%	1.03%	6.88%

Please provide also the
country code for the most
relevant group

Comments	
----------	--

Publication thresholds

Minimum size of sub-population for which results must be flagged because of diminished reliability	1200
Minimum size of sub-population for which results must be suppressed because of diminished reliability	500
Comments	

Pilot survey or laboratory tests of the LFS AHM

Date of the pilot survey in order to test the module questionnaire	no pilot survey
Number of respondents to this pilot module survey	NA
Date and brief description of the laboratory tests in order to test the module questionnaire	NA
Number of respondents to the laboratory tests	NA
Comments	

Training of interviewers

No special training (Y/N)	N
Written instructions (Y/N)	Y
Meeting of interviewers (Y/N)	N
Training course (Number of hours/N= no course)	N

Comments	
----------	--

Unit non-response (NEW)

Rate of non response (persons who answered to the core LFS but not to the AHM to total persons who answered to the core LFS):	0%
---	----

Item non-response

Variable	Share of item non-response (NEW)	Imputed (Y/N)?	If Y, imputation rate	Comments

Timeliness and punctuality related to the LFS AHM

Reference period, transmission date and coverage

<i>Main dates in the national production process</i>			
<i>Date of data collection beginning</i>	<i>End-date of the quality checks for statistics requested by Eurostat</i>	<i>Module data transmission dates to Eurostat</i>	<i>Date of national publication</i>
4th week in January 2008	first week March 2009	March 13th 2009	results will be published in a national publication in the 2 semester 2009

Reason for late delivery to Eurostat, if any (i.e. after 31 March 2009)

<i>Describe reasons for late delivery mentioning all bottle-necks</i>

Accessibility and clarity of the LFS AHM data

References to ad hoc module results dissemination

<i>publication in the 2nd semester 2009</i>
<i>first short results have been published in a press release for the celebration of May 1st</i>
