

EUROPEAN STATISTICS COMPETITION

Ready to become a data scientist?

This exciting challenge invites secondary school students to team up and put their statistical skills to the test. You'll tackle real-world data problems, search for key information, and create your own analyses.

The goal? To boost your understanding of statistics and show how it applies to everyday life, all while encouraging teachers to explore fresh, engaging ways to teach with real data from official sources.

Compete against other teams in your age group for a chance to win amazing high-tech prizes.

Only the top three teams will claim victory
—will yours be one of them?
